After seeing the card in both these options, you have to select a card. After selecting a card, if the card you choose wins, you will also win the winning amount you placed on the game. On the other hand, if the card you choose loses, you will also lose the winning amount of the game.

After opening the cards, letters appear several times. Which are seen as numbers in the Dragon vs Tiger game.

For example, A means 1, K means 13, Q means 12 and J means 11.

Dragon vs Tiger Tricks 2023 List

1st Trick – Dragon Tiger Formula Trick

The most important rule of this tiger vs dragon game tricks is that you have to follow the number coming in the option of Dragon. Now suppose that a card named A,1,2,3,4,5 comes in the option of Dragon, then at that time you have to bet on Tiger. If a card named 6,7,8,9,10,J, Q, K appears in the Dragon option, you have to bet on the Dragon side.

If you use this trick in Best Rummy App then your chances of winning will increase a lot, because personally we have used this trick in Best Rummy App, and we have won many times.

So we would recommend you to try this app in [Best Rummy App](#).

2nd Trick – dragon Tiger Calculator Trick

As you already know that there are two options, dragon & tiger. Now suppose that 10 number card has been opened in Dragon option and three number card has been opened in Tiger option.

Now you have to add both the numbers coming in the option of Dragon and Tiger, such as $10 + 3 = 13$. After calculating, if that number comes in the category

of odd number, then you have to play in Dragon's option. On the other hand, if even number comes after calculating, then you have to play in Tiger's option.

Third Trick

There are two options Dragon and Tiger, now you have to calculate the numbers appearing in both these options.

Below we have given the chart of numbers of Dragon and Tiger. After calculation, if your number comes in Dragon's option, then you have to play in Dragon's option. On the other hand, if your number comes in Tiger's option, then you have to play in Tiger's option.

But this dragon vs tiger tricks will work on [Holy Rummy app](#), so we recommend you to use this trick in this app.

Dragon number list	Tiger number list
3	2
5	4
7	5
9	8
11	10
13	12
15	14
17	16
19	18
21	20
23	22
25	24

Fourth Trick

As you know there are two options, Dragon and Tiger on which you have to play the game. In this trick, you have to pay special attention to the color and number of cards that are opened in both these options.

Now suppose that in the option of Dragon there is a card named A of red color and in the option of Tiger there is a card numbered five whose color is black. Then suppose there is a black big number card on the side of the dragon, then in this case you have to play on the side of the dragon.

Let us explain by giving another example that suppose the number three card of black color came on the side of Dragon and the number 7 red color card came under the option of Tiger. Now here the red colored card is big which is below the option of Tiger, so you have to play in the option of Tiger.

In simple language, let us tell you that if the black card is big, then you have to play in dragon option. If the red card is big, then you have to play in Tiger's option.

Fifth Trick

In this tiger vs dragon game tricks, the numbers present in the option of Dragon and Tiger have to be calculated. After doing the calculation, that number has to be divided by 2.

After dividing, if the number is less than 8, then you have to play in Tiger's option. On the other hand, if the number is more than 8, then you have to play in the dragon option.

Just doing this will greatly increase your chances of winning the dragon vs tiger game.
